

CASE STUDY: Positive Economic Impact

What is it?

- MeyGen, by SAE Renewables, is the world's largest planned tidal stream project between the Northern coast of Scotland and the island of Stroma.

Economic Impact

- MeyGen has boosted the local economy and generated employment opportunities.
- 43% of the project's capital expenditure was spent in Scotland, benefitting local companies in Caithness, Ross, and Cromarty.
- 55% of operations expenditure has been sourced locally.
