

CASE STUDY: Positive Environmental Impact

What is it?

- Located off the coast of Anglesey, Morlais is a vital project by Menter Môn, that has grid connected “berths”, which are leased for tidal stream devices to be tested.

Environmental Impact

- in 2024, Menter Môn completed an Environmental Monitoring and Mitigation Plan (EMMP) for Morlais, ensuring protection for marine mammals, seabirds, and migratory fish from tidal turbines.
- This will serve as a model for future projects, with ongoing data analysis continuously refining the EMMP.
