

# CASE STUDY: Sustainable Development

## What is it?

- Marine Energy Wales is a Pembrokeshire Coastal Forum project.
- They drive the advancement of marine renewable technology through collaboration, political engagement, education, & investment.
- They also manage the Marine Energy Test Area (META)

## Impact

- Marine Energy Wales has supported the development of key Welsh projects like Morlais and META, and fostered collaboration between industry, government, and communities.
- This has strengthened Wales' position as a marine energy leader.
